EDUCATION

BS Computer Science Punjab University

SOFTWARE ENGINEER

As a Full Stack Developer specializing in Next.js, React, and Node.js, I create dynamic web applications and captivating animations. I turn complex requirements into smooth, user-friendly experiences, optimizing performance and ensuring scalability. I thrive in collaborative settings, constantly embracing the latest technologies to stay ahead. My passion for building interactive, engaging experiences fuels my innovation in web development.

STRENGTHS AND EXPERTISE

- Next JS
- MongoDB
- TailWind CSS
- HTML 5
- Node.JS
- React
- Framer Motion
- JavaScript

PROFESSIONAL EXPERIENCE

Food Ordering App

[Git Repo](#)

June - 2024

- I built a user-friendly food ordering app using Next.js, integrating Auth.js for secure user authentication and Stripe for seamless payment processing. The app utilizes MongoDB for efficient data management, ensuring quick access to user and order information. This project highlights my ability to create seamless and efficient user experiences.

Tools

- Git version control
- MongoDB
- Tailwind CSS
- Postman
- Auth.js and Stripe
- VS Code

Movie Streaming App

[Git Repo](#)

August - 2024

- I built a Netflix-like movie streaming app using Next.js and Tailwind CSS, integrating a movie database API for real-time content updates. To improve the user experience, I implemented skeleton loading for smoother transitions and utilized Next.js Image Optimization to ensure fast loading times.

Tools

- Git version control
- TMDB API and Axios
- Tailwind CSS
- Typescript
- Shadcn library
- VS Code
